

Geotechnical foundation conditions for the diploma thesis No. ...

	▼▼	d=0,00m
SaH//sandy mud, <i>wet</i> , $I_D \approx 0,1$		d=0,85m
MSa+FSa, <i>slightly humid</i> $I_D=0,55$		d=5,70m
clsiSa, „B” $I_L=0,2$		<u>d=6,40m</u> d=7,20m
sand/gravel mix $I_D=0,7$		d=8,50m

Explanation of abbreviations and symbols:

d – depth below ground surface

SaH – sand with humus

MSa – medium-grained sand

FSa – fine-grained sand

clsiSa – clayey-silty sand

I_D – the degree of compaction

I_L – the liquidity index
